EXECUTIVE SUMMARY

B.Tech graduate in Computer Science & Engineering (AI & ML) with hands-on experience building production AI systems - RAG pipelines, multi-agent workflows, and backend services. Skilled in Python, FastAPI, LangChain, LangGraph, REST APIs, and vector databases, with additional experience in computer vision and modern DevOps tooling.

TECHNICAL SKILLS

- AI / GenAI:** LLMs, Generative AI, RAG, LangChain, LangGraph, MCP, AI Agents, Vector Databases
- Backend:** Python, FastAPI, Node.js, Express.js, REST APIs, API Integration
- Machine Learning:** PyTorch, TensorFlow, Scikit-learn, OpenCV, OCR
- Programming Languages:** Python, C++, JavaScript, TypeScript, SQL
- Frontend:** React, Vite, Tailwind CSS
- Databases:** PostgreSQL, MySQL, MongoDB
- Cloud / DevOps:** Git, GitHub, Docker, GitHub Actions, CI/CD, AWS

PROFESSIONAL EXPERIENCE

AI Engineering Intern - Induspic Engineers

Bengaluru, India | Dec 2025 – Present

- Designed and deployed an AI-powered business automation solution using LangChain, Retrieval-Augmented Generation (RAG), and vector databases, cutting average information-retrieval time by 49% and improving enterprise document search accuracy.
- Engineered an intelligent quotation automation workflow integrating AI agents, document processing, approval pipelines, and automated email delivery, reducing quotation turnaround time from 10 to 40 Days.
- Developed backend services and REST API integrations for centralized customer interaction and document management, supporting internal users / workflows across the organization.
- Collaborated with cross-functional teams to translate operational requirements into scalable AI-driven solutions, contributing to solutions moved into production.

SELECTED PROJECTS

SYNAPSE — Multi-Agent Autonomous Code Reviewer

[GitHub](#) | Feb 2026 – Apr 2026

- Built a multi-agent AI platform that reviews source code for security, maintainability, performance, and best-practice violations, analyzing 200+ PRs/repositories with 78% issue-detection accuracy.
- Integrated GitHub workflows, parallel agent orchestration, structured review pipelines, and automated Markdown reporting, cutting manual review time by 40%.

DeepXMed — AI Medicine Discovery Platform

[GitHub](#) | Jun 2025 – Aug 2025

- Built an AI-powered healthcare platform for medicine identification, prescription OCR, nearby pharmacy discovery, and cross-platform price comparison, achieving 95% OCR accuracy across 1500+ prescriptions tested.
- Integrated generative AI, authentication, search history, and cloud-based data management to support 100+ concurrent users.

AEgis — Real-Time Edge Video Analytics

[GitHub](#) | Nov 2024 – Jan 2025

- Developed an edge-AI video analytics system for real-time object detection and event monitoring, sustaining 40 FPS at 80% detection accuracy on *Security Filled Camera device*.
- Optimized inference pipelines, reducing latency from 39 ms to 24 ms while maintaining detection accuracy.

EDUCATION

Garden City University, Bengaluru, India — B.Tech, Computer Science & Engineering (AI & ML)

CGPA: 8.4/10.0 | Graduated: July 2026

CERTIFICATIONS

- Model Context Protocol (MCP) Developer — Anthropic (2026)
- Building with Claude API — Anthropic (2026)
- Deep Agents — LangChain Academy (2026)
- TensorFlow: Advanced Techniques Specialization — Imperial College
- Python PCAP: Certified Associate — Cisco Networking Academy
- Python Essentials — Cisco Networking Academy
- AWS Solutions Architecture Job Simulation — Forage
