SUMMARY

B.Tech graduate in Computer Science & Engineering (AI & ML) with hands-on experience in IT automation, AI applications, and backend development. Built RAG workflows, AI-agent automations, REST API integrations, OCR pipelines, and computer-vision systems using Python, FastAPI, LangChain, PyTorch, and OpenCV.

TECHNICAL SKILLS

AI / LLM: RAG, LLM Applications, LangChain, LangGraph, AI Agents, MCP, Vector Databases

Backend: Python, FastAPI, Node.js, Express.js, REST APIs, API Integration

ML / Vision: PyTorch, TensorFlow, Scikit-learn, OpenCV, OCR

Engineering: C++, JavaScript, TypeScript, SQL, PostgreSQL, MongoDB, Git, Docker, GitHub Actions, AWS

PROFESSIONAL EXPERIENCE

IT Automation Intern — Induspic Engineers Bengaluru, India | Dec 2025 – Present

- Built an internal document-search workflow using Python, LangChain, Retrieval-Augmented Generation (RAG), and vector databases, reducing average information-retrieval time by 49% compared with the existing manual lookup process.
- Developed an automated quotation workflow combining document processing, AI-assisted information extraction, approval steps, and email automation, reducing manual effort in quotation preparation and follow-up.
- Developed backend services and REST API integrations for internal business workflows, connecting document processing, customer information, and automated communication.
- Automated repetitive IT and operational processes by integrating AI workflows with existing business systems, reducing manual intervention and improving consistency across recurring tasks.
- Worked with business and operational teams to understand workflow requirements, implement automation solutions, test outputs, and support their transition into internal use.

SELECTED PROJECTS

SYNAPSE — Multi-Agent Code Reviewer

[GitHub](#) | Feb 2026 – Apr 2026

- Built a multi-agent code-review system that analyzes repositories and pull requests for security, maintainability, performance, and coding-practice issues using specialized review agents.
- Implemented parallel agent execution, GitHub workflow integration, structured review outputs, and automated Markdown reports, reducing manual review effort by ~40%.
- Evaluated the system across **200+ PR/repository samples** and achieved **78% issue-detection accuracy** against the defined evaluation set.

DeepXMed — AI Medicine Discovery Platform

[GitHub](#) | Jun 2025 – Aug 2025

- Built an AI-assisted medicine discovery platform combining prescription OCR, medicine search, pharmacy discovery, and price comparison across multiple online sources.
- Developed the prescription-processing pipeline and evaluated OCR performance on **1,500+ prescription samples**, achieving ~95% **recognition accuracy** on the project evaluation set.
- Integrated authentication, search history, AI-assisted responses, and cloud-based data storage to support the application's core user workflows.

AEgis — Real-Time Edge Video Analytics

[GitHub](#) | Nov 2024 – Jan 2025

- Developed an edge-AI video analytics system for real-time object detection and event monitoring on a security-camera video stream.
- Optimized the inference pipeline to sustain ~40 FPS while achieving **80% detection accuracy** on the project evaluation dataset.
- Reduced average inference latency from **39 ms to 24 ms** through pipeline and inference optimizations while maintaining comparable detection performance.

EDUCATION

Garden City University, Bengaluru, India — B.Tech, Computer Science & Engineering (AI & ML)

CGPA: 8.6/10.0 | Graduated: July 2026

CERTIFICATIONS

- Model Context Protocol (MCP) Developer — Anthropic (2026)
- Building with Claude API — Anthropic (2026)
- Deep Agents — LangChain Academy (2026)
- TensorFlow: Advanced Techniques Specialization — Imperial College
- Python PCAP: Certified Associate — Cisco Networking Academy
- Python Essentials — Cisco Networking Academy
- AWS Solutions Architecture Job Simulation — Forage
